Call For CONFERENCE

24 - 25 APRIL 2024

ABOUT THE CONFERENCE :

ICDSAI 2024 aims to provide a forum for researchers from both academia and industry to share their latest research contributions, future vision in the field and potential impact across industries of Data Science and artificial Intelligence. Join us, 24-25 April 2024, to explore discovery, progress, and achievements related to various Data Science and artificial Intelligence.

ACCEPTANCE & PUBLICATION :

After a double-blind peer review, qualifying Regular Papers may be accepted as either Full Papers or Short Papers. All accepted and presented papers of the conference will be reviewed for possible publication in SPRINGER. The papers must be part of the worldwide scholarly discourse in the field covered by the library. The reviews will be done to make sure papers are relevant for the chosen classifications to ensure subscribers receive relevant content. NO extra fee is charged from authors for inclusion in proceedings. Authors will grant a non-exclusive, revocable license that allows providing services to users.

INDEXING :

Post-conference, proceedings will be made available to the following indexing services for possible inclusion: **ISI CONFERENCE PROCEEDINGS CITATION INDEX - ISI WEB OF SCIENCE, GOOGLE SCHOLAR, SCOPUS, DBLP**. Depending on the focus of the particular indexing services, they may decide to include or not. If included one can expect it in 15-18 months. DBLP and Google Scholar are fast.

The ICDSAI 2024 registration fees are as follows, and must be paid in USD or in local currency as per the current exchange rate Important Dates and Registration Fees

Objectives and Scope:

The main goal of the DS&AI 2024 conference series is to contribute to the growth of the data science and artificial intelligence knowledge in developing countries in South-East Asia region. Provides the platform for researchers and practitioners from developed and these developing countries to share their knowledge and expertise on data science and artificial intelligence and discuss the latest development in the field, so to build capacity and improve the understanding of data science and AI in the South-East Asia region. The DS&AI conference brings together researchers from different countries providing an opportunity to foster the development of partnerships and collaboration. By Raising awareness aims to stimulate and to help the development of data science and artificial intelligence research and application in these countries.

Session Tracks:

- Machine Learning
- Deep Learning
- Reinforcement Learning
- Robotics
- Natural Language Processing
- Computer Vision
- Expert Systems
- Social Network Analysis
- Ethical Hacking
- Data Analytics
- Chemical Modelling
- Image Processing
- Cyber Security
- Cloud Service, Computing & Applications
- Communication Engineering
- Computer Networks, Security & Applications
- Internet of Things
- Block Chain Technology
- Big Data
- Smart Wearable Devices
- Virtual Reality
- Weather Forecasting

Note: Topics of interest include, but are not limited to, the above
